Exploring Sydney  
by Ferry

Calm and Composed  
on the Bus

Making New Four  
Legged Friends

Faith is on a journey. Making better choices today than yesterday. Finding confidence in her abilities and interactions and building resilience. Her self-settling skills are amazing and her ability to transfer skills and behaviours to different environments, as recently amply tested, is outstanding. A true SuperPup in the making. Faith is equally at home at our Puppy Carers, who support our Educators when needed, or when joining her family on road trips.

Public access and transport training continues with big news of conquering the travelator! She swapped bush for beach and dipped her paws in the ocean for the first time. We also tested her sea legs and found them working beautifully on our recent ferry trip to the city. Faith recently experienced her first season and emerged with a new calmness and maturity. Don't worry there is still plenty of spunk and a carefree exuberance on display and we wouldn't have it any other way!
